

Rivor Ability Tools®

Adapt/Ability Index®

A diagnostic tool that analyses the factors that contribute to potential risks and create vulnerabilities within your organisational teams.

We make it work

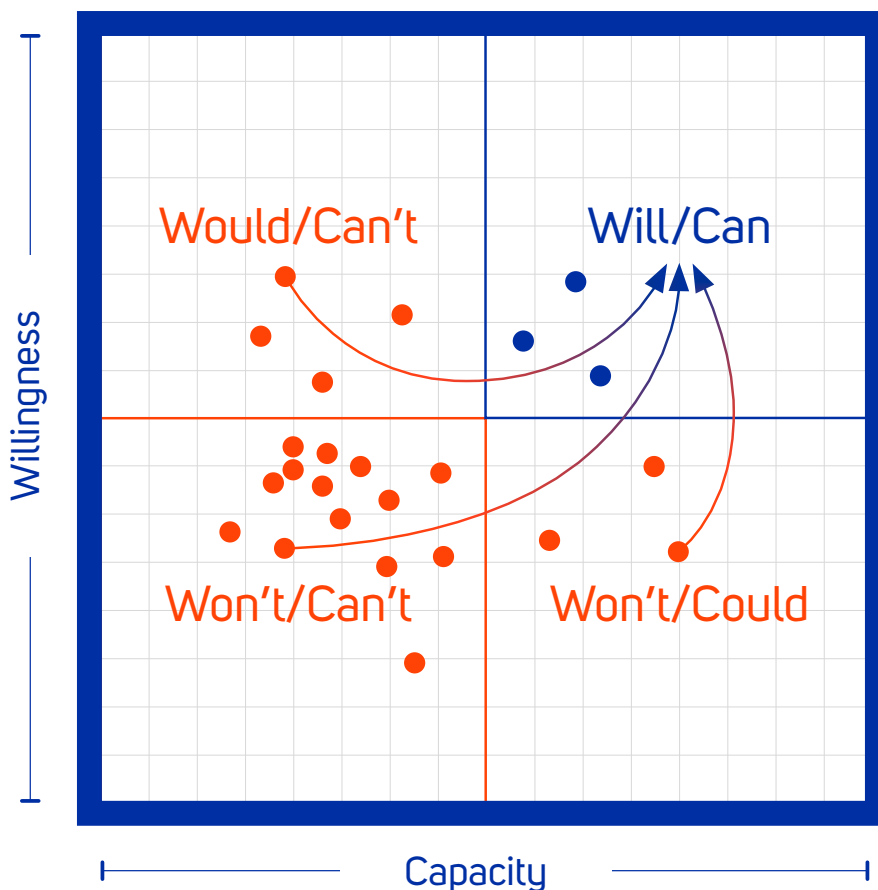

RIVOR
Advisory

Reveal hidden risks, productivity bottlenecks, and barriers to change

Becoming an adaptable organisation is critical to navigating the ever-changing business landscape successfully. In today's dynamic environment, adaptability is key to survival, enabling businesses to respond swiftly to technological advancements, market shifts, and unforeseen challenges. Organisations that fail to adapt risk becoming obsolete, while those that embrace change can gain a competitive advantage.

Uncover what's holding you back

The Adapt/Ability Index® is a diagnostic tool that analyses people's willingness and capacity within organisational teams to identify how they can be more productive, resilient, and adaptable.

Will/Can

In this quadrant, you have both the willingness and the ability to take on or adapt to change. It's the ideal position, as you're motivated and equipped to succeed.

Would/Can't

Here, there is willingness and motivation, but a lack of the necessary capability or resources to achieve results. It often highlights areas where development or support is needed to bridge the gap.

Won't/Could

This quadrant represents situations where there is the capability or capacity to do something, but there is a lack of willingness or motivation to pursue it. It signifies missed opportunities or untapped potential.

Won't/Can't

In this quadrant, there is neither the willingness nor the ability to adapt. It signifies a clear mismatch between the requirement and the individual or organization's capacity and motivation.

Fast and cost-effective

Backed by decades of experience, there is no other comparable product on the market that can give you the rapid and comprehensive actionable insight delivered by the Adapt/Ability Index®. It allows you to delve deeper into identified risks and concerns, inform strategic interventions, share findings with stakeholders to secure buy-in and support, and ultimately become an adaptable organisation.

- > **Condense weeks of consultation into a 45-minute shared experience.**
- > **Assess the willingness and capacity of your organisation to achieve your goals.**
- > **Fast and easy to deploy.**
- > **Get the results within 48 hours.**
- > **Actionable insights at a price you can afford.**

An intelligent adaptability diagnostic tool

The Adapt/Ability Index® serves as a valuable tool for gauging an organisation's ability to cultivate and sustain adaptability. It does so by pinpointing the pivotal elements that foster continuous improvement, forestall stagnation, and elevate the prospects of success for projects or strategies. This comprehensive analysis assesses adaptability at every level of the organisation, evaluating willingness and capacity across key dimensions.

Identify what's creating risk

Understand the elements that create vulnerability across organisational roles and teams.

Identify what's blocking productivity

Systematically identify and address the factors hindering productivity across individual roles, teams, projects, systems, and structures.

Identify what's stopping change

Reveal elements inhibiting adaptability, and proactively address issues like resistance, collaboration gaps, unclear expectations, inefficiencies, and rigid structures that hinder your response to change.
